

NEUTRALISING SYSTEM

bomat-CleanTec[®] RNA-WT1-800

RNA-WT1-800
32 x 20 x 21 cm (LxWxH)

Drum RNA-WT1-800

Now with new patented **drum technology** and improved **performance** tested according to **DVGW VP 114**.

Suitable for systems with up to 350 kW combustion output.

Highlights of our RNA-WT1-800:

- **Neutralisation performance:** approx. 30,000 ltr./cartridge (depending on condensate composition)
- For condensates from oil and gas combustion, CHP units and biomass
- Very straightforward maintenance through cartridge change and hassle-free disposal of maintenance materials
- Self-cleaning function prevents build-up of sludge in the neutralisation granules
- Efficient and space saving
- Low electricity costs: approx. € 5 per year (depending on the term)
- Low weight
- Activated charcoal pre-filtering possible via separate unit
- Rotational speed and run time of the drum individually adjustable
- EMV tested
- DVGW VP 114 tested
